

One source. One promise.

*"We provide one source for customers to gain greater control and access in a global marketplace."*

## We keep your business moving

---

At Axsun, we have built on the extensive experience of our management team to become Canada's leading intermodal provider. A young company (founded in 2003), our philosophy is to offer an integrated mix of transportation and distribution services to our customers. We are one of the first Canadian transportation companies to incorporate SAP technology and as a result, our customers have gained increased access to vital shipment information and the tools they need to manage their business more effectively.

Our core service is providing customers with a seamless cross border mix of intermodal full load and LTL from the USA and Mexico to Canada. We have offices in Montreal, Toronto and Mexico, with the qualified people and resources you need to handle your complete requirements. We offer a hybrid model of asset and non asset based transportation and distribution services. We are appreciative of our customers, our team and excited about our future and ability to provide One source. One promise.

We've added competitive advantage through better managed distribution of product and provide our customers greater control and easy access to a global marketplace. Our comprehensive menu of services includes:

- Intermodal
- Highway
- Drayage
- Warehousing
- Global Freight

One source. One promise.

*“In addition to full loads, Axsun now provides intermodal LTL between Canada and the USA through our unique, single clearance gateway program.”*

## A lifetime of intermodal experience

---

Our customers rely on us as the experts in the door to door shipment of their product...across all NAFTA borders. Our expertise in intermodal shipping between Canada, the USA and Mexico is derived from decades of experience and a desire to create proactive, cost effective and well managed solutions for our valued customers... both small and large.

As one of the few Canadian companies that specialize in this field, our partnership approach to managing your intermodal freight requirements has caught on. Our management has decades of intermodal experience and solid industry contacts that make the multi-rail network in the USA virtually seamless. We have well established relationships with all North American railways and have our own 53' containers to supplement your requirements, adding capacity and greater control for your shipment requirements.

Our down to business attitude, attention to detail and communication-rich environment translates to superior service, versatility and unmatched intermodal performance. We use the container type and routing that suits your needs best throughout North America's domestic and cross border markets.

One source. One promise.

*"You receive all the benefits of dealing directly with a carrier. Add to that—improved customer service, greater flexibility and, most of all, capacity."*

## The best of both worlds

---

At Axsun, we are both a carrier and a 3PL. This gives us the resources to offer customers additional capacity and equipment types when and where they need it most. Highway moves are well suited for shipments requiring expedited delivery and to access destinations where intermodal service is not readily available.

You can trust Axsun to move your goods between any point in Canada, the USA and Mexico and provide exactly the right equipment for the job at hand. We provide:

- LTL, partial and full truckload service
- Flatbed, heavy haul and temperature controlled services
- Canada Customs Bonded Carrier

One source. One promise.

[axsungroup.com](http://axsungroup.com)

*"No matter where you ship or what transportation mode you choose, you can trust Axsun to deliver the optimum solution to best suit your needs."*

## Serving the ports and rail yards

---

For greater performance and control, we've expanded our company fleet to pick up and deliver ocean and rail containers. It's an integral part of our total service package. Along with reducing expensive demurrage charges, we can accommodate the effective stuffing and de-stuffing of all container types. Our facilities are located at primary distribution points with ready access to key ports and rail yards.

Our modern company owned trucks are balanced with an owner/operator fleet at each of our locations. This allows us to meet seasonal swings in activity across a wide range of customers, importing containers from origins worldwide or shipping domestically within Canada and the USA. Our chassis fleet can accommodate both 20 and 40 ft sea containers and 53' domestic containers. We provide quick delivery to your door or ours, for your further distribution requirements.

Customers without their own distribution facilities, rely on us to complete the distribution process. We provide pick and pack services for furtherance by both intermodal and highway modes throughout North America. Or, we can offer both short and long term storage of your goods at our modern warehousing facility while further distribution plans are being confirmed.

One source. One promise.

[axsungroup.com](http://axsungroup.com)

*“Our modern warehouse facility is ideally suited for the stuffing and de-stuffing of ocean containers.”*

## The capacity to serve

---

Our head office in Montreal features a custom built warehouse facility with ready access to the ports, highways and rail yards integral to the effective distribution of your freight. Our ultra-clean and secure facility features 28 ft ceiling clearance, EFSR sprinklers and 68,000 sq.ft. of capacity to meet your short and long term warehousing requirements.

In addition to cross docking, the stuff and de-stuff of containers and facilitating any special packaging requirements, please note these additional features:

- C-TPAT and HACCP food grade facilities
- Short and long term warehousing
- Inventory control and WMS
- Fulfillment, kitting and complete pick and pack services

One source. One promise.

*“Axsun Global adds a further dimension to our menu of services and our determination to be an effective resource for our customers’ total transportation requirements.”*

## A natural fit for us and our customers

---

The addition of international forwarding services allows us to offer solutions for the complete management of our customers’ supply chain. Axsun Global has established a worldwide network to serve our customers to the fullest. To spearhead the move into this arena, we have hired forwarding professionals to integrate with our well-established North American logistics network. Features include:

- Full load and LCL ocean imports and exports
- First flight out and consolidation air freight shipments
- Preparation of all documents including letters of credit

One source. One promise.

[axsungroup.com](http://axsungroup.com)

*“We make it easy for our customers and Axsun team members to access vital shipment and account information in real-time.”*

## We make the shipper's life easier with SAP technology

---

At Axsun, we invest in our business, our business relationships and the people who make our business successful.

With Axsun, customers experience a seamless set of integrated, cross-functional business processes that make the management of their supply chain easier. The overall benefits are extensive and are a direct result of these “SAP based” improvements to our operations which include:

- Improved alignment of strategies and operations in real time to access and identify concerns early and implement proactive solutions
- Improved operational efficiency and productivity within and beyond operations
- Reduced costs through increased flexibility and well defined processes
- Increased financial control through deep visibility and business analytics

By incorporating the latest BlackBerry Playbook technology Axsun account representatives have access to real time, instant access to each client's shipping information and profile to address any concerns or questions on the spot and in an instant. This is a further benefit of the SAP technology incorporated at Axsun.

One source. One promise.
